Allowable subject matter

Claims 1-26 are allowed.

The following is an examiner's statement of reasons for allowance: The prior art neither discloses nor suggests the following limitations, in the combination with the remaining elements in the independent claims:

- a plurality of extension lines extending to the plurality of address electrodes, respectively, such that the insulating film is enclosed between the plurality of extension lines and the plurality of control lines on the second substrate and such that the plurality of extension lines intersect with the plurality of control lines to form a plurality of intersecting portions, and each of the plurality of extension lines has one disconnected portion at the plurality of the intersecting portions such as required by claim 1;
- a plurality of extension lines extending to the plurality of address electrodes, respectively, such that the insulating film the diode functional film generally extend between the plurality of extension lines and the plurality of control lines on the second substrate, such that the plurality of extension lines intersect with the plurality of control lines to form a plurality of intersecting portions, and such that the insulating film has one aperture in one of the plurality of intersecting portions such as required by claim 9;

- a plurality of extension lines extending to the plurality of data electrodes, respectively, such that the plurality of extension lines have overlapping portions which overlap end portions of the control connection lines one the second substrate to sandwich the insulating film and the diode functional film, wherein the insulating film has aperture portions in one of the plurality of intersecting portions and in the overlapping portions such as required by claim 18.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Hayashi (6,614,411) discloses a plasma address display apparatus. Bancal (6,028,574) discloses a device for switching the anode of a flat display screen. Miyazaki (5,800,232) discloses a plasma addressed display panel. The above references do not suggest the claimed invention.
